A BIRD'S EYE OF THE BENCH: BEHIND THE SCENES OF SCIENTIFIC PUBLISHING

What does the job of a scientific editor entails, and what do they do in their daily work at Cell Press?

A look into the life cycle of a paper, from preparing the initial submission through peer review and final editorial decisions.

Jenna Sternberg received her Ph.D. from Sorbonne Université, studying sensory neurons in the zebrafish spinal cord with Dr. Claire Wyart. She was a Human Frontier Science Program postdoctoral fellow in the lab of Dr. Alex Schier at Harvard University, where she studied neuroendocrine cells in the gut. She joined the Cell Reports editorial team in 2019 and loves reading papers across the biological sciences
